PROJECTS

Portfolio_2023

Link to the project:
https://marinayurkevich.github.io/Portfolio_2023/

Used technologies:
Angular, TypeScript, HTML5, CSS3; adaptive design.

Description: Portfolio_2023 is a project created like a personal online resume built on Angular, with adaptive design.
It contains the information like education, skills, projects, contact info.

Current Weather Widget

Link to the project:
https://github.com/Marinayurkevich/widget_currentWeather

Used technologies: **JavaScript, API Requests, HTML5, CSS3**

Description: Current Weather widget is a widget, which displays current time (date, time, day of week) and current weather by default in the city where the widget user is located. User can change the city and widget will display weather data in that city. Form with input search appears, when user choose "location mark".

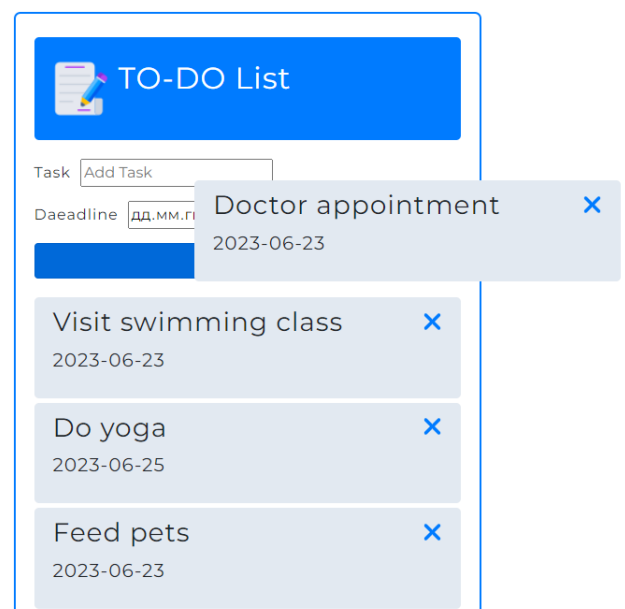

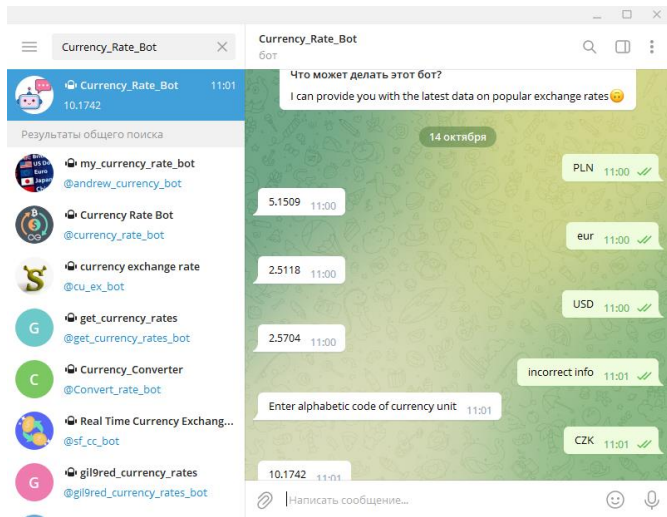

TO-DO List

Link to the project:
https://github.com/Marinayurkevich/task_tracker

Used technologies: **Angular, Angular Material, TypeScript, JSON server.**

Description: You can create a new task, set a deadline for this task, delete task, and reorder tasks using drag and drop.

Currency Rate Bot

Link to the project:

https://github.com/Marinayurkevich/Currency_Rate_Bot
Used technologies: **Golang, API HTTP Requests**

Description: Currency_Rate_Bot is a Telegram Bot that provides you with the latest data on popular exchange rates.
